SPIDER MASK

Step 1

Use a sponge and pink paint to create the wings around the eyes.

Step 2

Using a round brush and black paint, paint the spider's body. Add the legs using small teardrops around the body.

Step 3

Use a finger dauber loaded with purple and pink to apply colour to the eyelids and create a round dot in the centre of the forehead.

Step 4

Paint the remaining spider legs. Build each leg using two small teardrops and finish with a light flicking motion to create a thin line.

Step 5

Create the spiderweb by painting teardrops from the top of the wing down towards the outer corner of the eye. Connect them with small, curved brushstrokes.

Step 6

Finish the design by outlining the eyes in black and adding small white dots and highlights to the wings and spider.

Extra details

Add colour to the lips

Add glitter

Paint vampire fangs

Add fake blood
