Dragon

Step 1

Using a sponge, apply yellow over and around the eye.

Step 2

Use an angle brush to paint the shape of the dragon's head.

Step 3

Use a stencil and sponge to create scales. Outline the dragon's head with a darker color.

Step 4

Use a round brush to paint the pupils as two black lines over the yellow eyes.

Step 5

Use white to add two small dots near the pupils and paint horns on the forehead. Use black to outline the horns.

Step 6

Optional: Add glitter for a more magical look, or blood details for a scarier dragon.
