CLAW MARKS

What you will need:

Colors:

- Red (Superstar fire red)
- Black (DFX black)
- White (DFX white)

Tools:

- Round brush no. 3 or 4
- Fake blood
- Filbert or blending brush (optional)

CLAW MARKS

Step 1

Using a slightly damp filbert or blending brush, paint red marks. Keep them slightly translucent for a more realistic effect.

Step 2

Using a round brush, paint red claw marks, varying each stroke from thin to thick to thin. They don't need to look neat or perfect.

Step 3

Using a round brush, paint a thin black line along one side. Use a finger or a dry brush to smudge it slightly.

Step 4

Add very thin white highlights on the opposite side to the black.

Step 5

Add fake blood for extra effect.
