STEP-BY-STEP

SPIDER

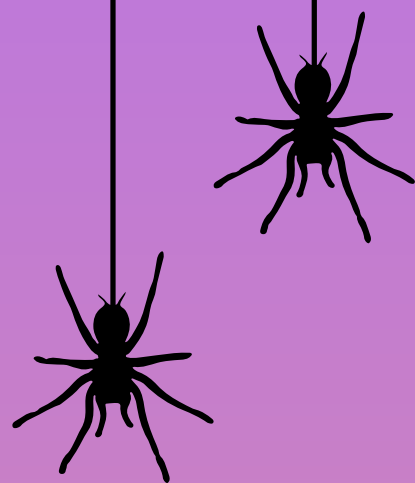

Gertruds

UNIVERS

SPIDER

What you will need:

Colors:

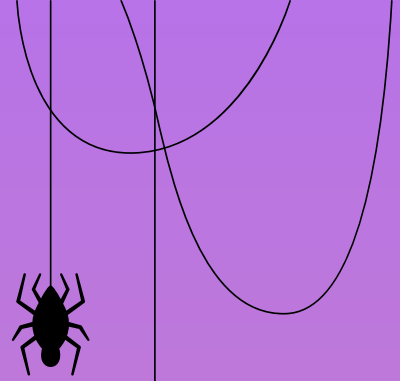

- White (DFX white)
- Black(DFX black)
- Splitcake (e.g. green)

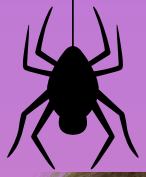

Tools:

- Round brush no. 3 or 4
- Dauber
- Glitter (optional)

SPIDER

Step 1

Use a slightly damp finger dauber loaded with colours from a split cake to create a circle on the cheek.

Step 2

Using a round brush, outline the circle. Then paint a small circle for the spider's head.

Step 3

Use a round brush to paint the legs. Start them from the same point between the head and body, spacing them evenly on both sides.

Step 4

Each leg is made up of two small teardrops and finished with a quick flick to create a thin line

Step 5

Use white to add highlights to the body and head. Add highlights to all the legs for a more defined effect.

Step 6

Finish the design with details such as dots or a spiderweb, or leave it as it is.

SPIDER DESIGNS

Endless Possibilities

Spiders are always a Halloween favourite. The only limit is your imagination!
